

SENSUS[®]+

Shape conforming comfort and superior pressure relief

Overview

Sensus[®]Plus offers a plush, luxurious feel with a slow recovery time for enhanced pressure relief. The unique feel these higher density memory foams offer allows the foam to conform to the body to deliver personalized support and pressure relief to maximize comfort. The new and improved Sensus[®]Plus formulation is also now CertiPUR-US[®] certified, meaning it is made without formaldehyde, phthalates, mercury, ozone depleters, and provides low VOC emissions for indoor air quality. Its superior properties are largely a result of the VPF[™] manufacturing technology, which ensures consistent high quality and environmentally friendly foam.

Benefits

- Shape-conforming comfort to provide personalized support and pressure relief where it is needed most
- Enhanced pressure relief
- Plush, luxurious feel
- Scientifically tested for long-lasting durability and comfort
- Environmentally friendly VPF[™] technology
- CertiPUR-US[®] certified

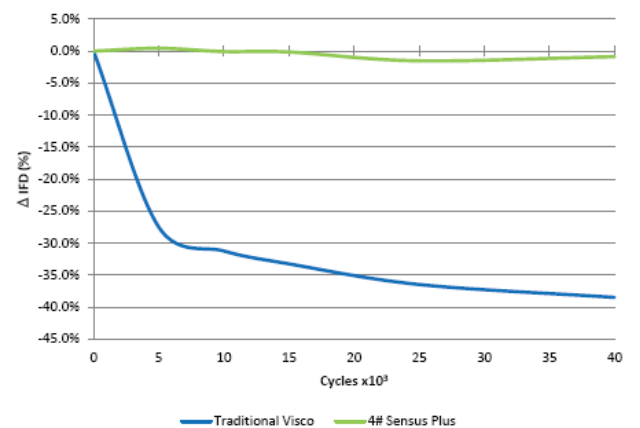

Enhanced Pressure Relief

Innerspring mattress vs. same mattress with 3" Sensus[®] Plus topper placed on top

Virtually 0% IFD loss after 40,000 Cycles

ASTM D3574 Test I₃: Constant Force Pounding Fatigue

The superior properties of FXI specialty bedding foams are largely a result of the patented VPF[™] manufacturing technology, or Variable Pressure Foaming. This proprietary process uses an enclosed chamber to maintain constant atmospheric conditions, delivering a consistently high quality, perfectly formed product with every run. In addition to producing best in class foam, VPF protects our environment with virtually zero emissions, completely eliminating CFCs and other blowing agents that can be harmful.
